

**MEDICATIONS TO AVOID PRIOR TO SURGERY**

Use this guide when your doctor tells you not to take Aspirin, Aspirin containing products, non-steroidal anti-inflammatory medications (NSAIDS) and/or anticoagulants (blood thinners) prior to surgery. Many over-the-counter drugs contain Aspirin (acetylsalicylic acid) or Ibuprofen. Check the drug label for this information. Do not take these drugs prior to surgery. Inform your doctor or nurse of all prescription and non-prescription drugs you are taking. If you have any questions about a medication, ask your doctor, nurse or pharmacist.
