

VASECTOMY
PREOPERATIVE INSTRUCTIONS

Your appointment for voluntary sterilization by Bilateral Vasectomy is on

_____ at _____

Please obtain a scrotal support from your pharmacy and bring it along with you to the office on the day of your appointment. Be sure to wear loose fitting clothing.

Do not take any form of Aspirin, Advil or products containing Aspirin for seven days prior to your scheduled vasectomy. See enclosed complete listing of these products. If you are taking any prescribed medication, be sure to check with your prescribing doctor or your pharmacist to make sure it would not cause your blood to be thin. If so, that medication would also have to be stopped.

Continue to take any other medications prescribed by your physician as you normally would.

Shave your scrotum and the base of your penis on the evening prior to your Vasectomy.

Please be advised – 48 hours notice must be given for cancellations or you may be charged for the visit.
